This layout is to show the combination / alignment of the Portrait & Landscape images on a single page.

In this option we are following the same 3 columns grid, the landscape image will fit in to the same width of the general thumbnail image.

1 Displaying pictures in both Portrait & Landscape formats.

CONS:

irregular spacing, page can look bit awkward. Lots of dead space.

SOLUTIONS:

If possible, we should be able to arrange all the landscape pictures together and then portrait mode pictures, or vice versa in both *Search Results* and in the *Faceted Navigation*.

2 Faceted Navigation

RESEARCH FINDINGS:

White Company:

- This company is showing the products in Landscape mode in PLP but not in PDP.
- As they are showing the products in Portrait Mode in PDP, they are using same portrait images for Shopping Bag Panel, Shopping Bag Page, Search Results.
- They have the individual shots for Pillows & Duvet Covers and a group shot for whole range.

Nieman Marcus / John Lewis / House of Fraser:

- They are using all Portrait Images.
